Juliana's Journey: Focal Dystonia and Deep Brain Surgery

Saturday, February 15, 12:45 - 1:35pm | Sully

With Juliana Nickel, professor of flute, George Mason University

Julianna will discuss focal dystonia and her reason behind agreeing to take part in a clinical trial at the National Institute of Health. She had deep brain surgery to alleviate focal dystonia symptoms, and is currently the only person in the world to have had this type of surgery for FD.
